ATOREMIM  
VRAISOLI

929.799  
f B 459

TO THE RIGHT HONOURABLE  
**WILLIAM WYNDHAM GRENVILLE, LORD GRENVILLE,**  
*CHANCELLOR OF THE UNIVERSITY OF OXFORD.*

---

MY LORD,

HIGHLY flattering as the Patronage of the Chancellor of one of the first Universities in the World must be to an Author, your Lordship's great literary fame adds lustre to the honor, and an additional weight of obligation, which I feel myself more inadequate to express than grateful to acknowledge.

The permission of dedicating to your Lordship this little Work, is a mark of favor and condescension, which I shall endeavour most duly to appreciate; and in the sincere hope that your Lordship's distinguished name may long adorn the Chancellorship of that Seat of Learning, where it has ever shone so eminently conspicuous; I beg leave, with the most profound respect, to subscribe myself,

My Lord,

Your Lordship's greatly obliged,

and most devoted humble Servant,

**W. BERRY.**

## P R E F A C E.

---

**G**R EAT and many have been the authors who have written upon Mythology and Ancient History in general, and it might justly be deemed the height of presumption in the Author of the following pages to attempt a subject so well and often treated upon before; but as this little Work is a compilation which embraces it in a very different point of view than hitherto attempted, and is intended as an Epitome of their more voluminous studies, he flatters himself with the hope that he shall steer clear of the imputation, by the novelty of the method which he has adopted.

The young Student, by recourse to the various Classical Dictionaries, may, it is true, find an historical account of the several persons whose names occur in reading the Classics; but such reference can only serve to elucidate the particulars of each individually; and the descent, offspring, and connexions, when thus read, cannot appear otherwise than confused, and consequently must be less easily retained, even by the best memories.

As the Genealogical part, not only of the Mythology, but of Classical History in general, constitutes a very material and necessary part of the study, the Author trusts that the difficulty of attaining that part of it will be easily removed by recourse to these Tables; where, by any single reference to the object of inquiry, the whole immediate descent, connexion, offspring, and collateral branches, are brought into one view, and the eye, at a single glance, enabled to attain as much knowledge of these particulars, as a week spent in confused researches would be able to effect.

In all researches into antiquity, Genealogy has ever been found of the greatest utility; and, without a thorough knowledge of the method used in tracing descent and family connexions, the Historical Writer would have been unable to prosecute his inquiries with success. The advantages that may be reaped in this particular, from the young Scholar attaining a perfect knowledge of the nature of it, blended with Classical Study, may not be altogether a minor consideration.

Where doubt exists as to any particular in the course of the Work, the Author has followed the opinion of the most approved writer upon the subject; and where the doubt is generally acknowledged, in some instances the descent is given both ways. But as errors can scarcely be avoided, even in works less complex, he relies on the candour and liberality of those who may discover them in a performance beset with many difficulties, especially in the heathen part of it; the fabulous history abounding with contradictions not easily reconciled.

Although some omissions and inaccuracies, in marking the quantities, may have escaped notice in the body of the Work, the Index will be found generally correct in this particular.

As an Appendix or Key to the Classics, this little Work will, it is presumed, be found of essential service to the higher class of Pupils at all public and private Seminaries, and particularly so to the Students at the Universities; and, as a Book of Reference, the Author flatters himself with the hope that it will be likewise of general utility in every Gentleman's Library; the Index forming, as it were, a Classical Dictionary, with the additional advantage of the reference embracing relative objects of inquiry in one view.

Should the indulgence it may receive call forth another Edition, any inaccuracies that may be kindly pointed out shall be carefully corrected. With its present imperfections, however, the Author ventures to offer it to the World, trusting more to the liberality and candour of a generous Public, than to any self-conviction of its peculiar merits.

# LIST OF SUBSCRIBERS.

## THE KING'S LIBRARY. HIS ROYAL HIGHNESS THE PRINCE REGENT.

H. R. H. THE DUKE OF KENT.

H. R. H. THE DUKE OF CUMBERLAND, Chancellor of the University of Dublin.

## ABBREVIATIONS AND EXPLANATIONS.

---

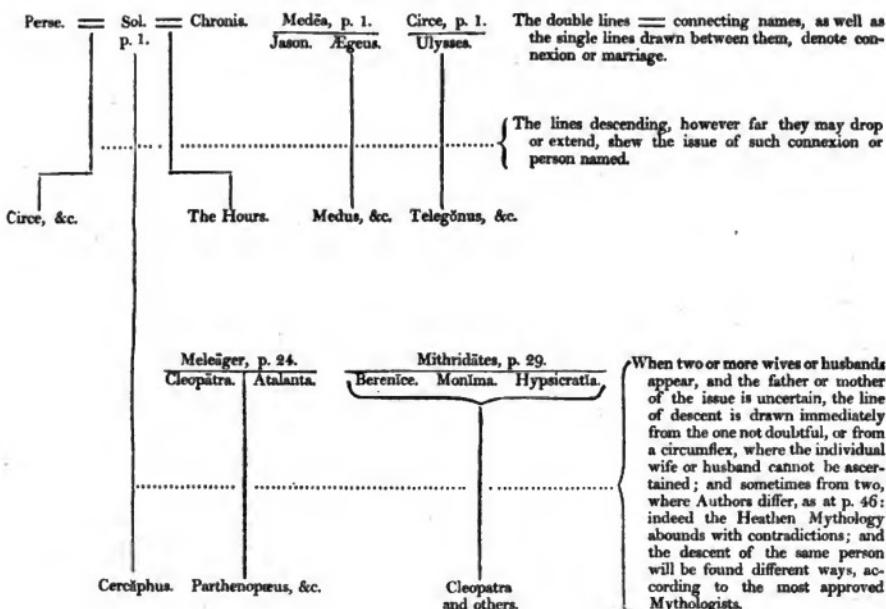

|              |                         |
|--------------|-------------------------|
| s. Son.      | D. Duke.                |
| d. Daughter. | M. Marquis.             |
| K. King.     | L. Lord.                |
| Q. Queen.    | C. Count.               |
| P. Prince.   | N. D. Natural Daughter. |

..... Dotted line—Doubtful descent.

..... Wavy line—Descent, but not immediately from father to son.

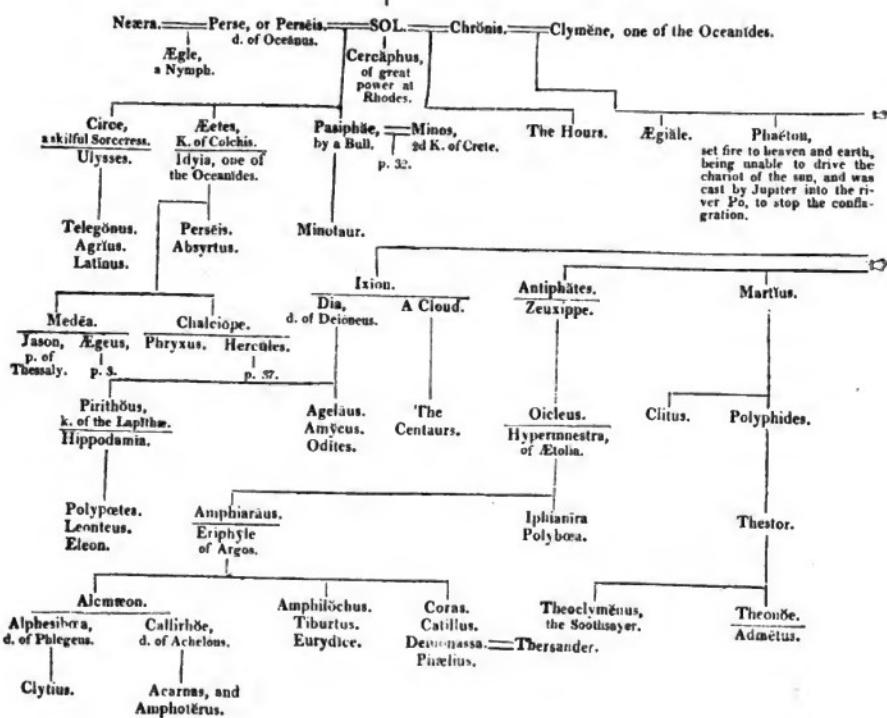

☞ The Hand points to the continuation of the line of issue.

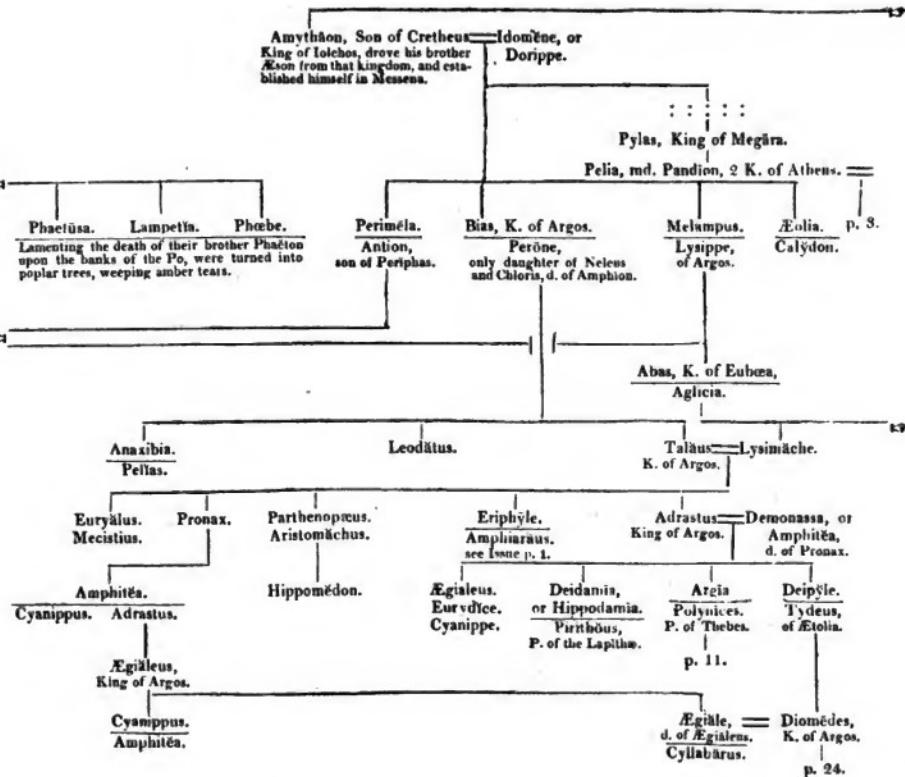

Index—The Italic *b.* signifies *bis*, twice; and *s. saepe* often.

*Note.*—As all the Classic Authors, Pantheon, Lemprière, L'Abbe, the Roman History, Anderson's Genealogies, Beetham's Tables, &c. &c. have been carefully consulted in the compilation of this Work, it was found utterly impossible to incorporate the several references without crowding the Pedigrees, and confusing the lines of descent.
